1Wetlands are identified and delineated using the methods and criteria established in the Corps Wetland Delineation Manual (87 Manual) (i.e., occurrence of hydrophytic vegetation, hydric soils and wetland hydrology). Processes for determining wetlands on agricultural lands may vary from methods described in the Corps Wetland Delineation Manual (1987).

2Wetlands separated from other waters of the U.S. by man-made dikes or barriers, natural river berms, beach dunes, and the like are also adjacent.

Rationale for Basis (applies to any boxes checked above): Wetland 1 includes Otter Creek, which drains to Ferson Creek, and to the Fox River, a navigable waterway, and is therefore jurisdictional. Otter Creek is a Class "B" stream. Wetland 1 is part of High Habitat ADID wetland #2003.

Lateral Extent of Jurisdiction (33 CFR 328 and 329):

☒ clear, natural line impressed on the bank
☒ the presence of litter and debris
☒ changes in the character of soils
☐ wetland boundary
☐ destruction of terrestrial vegetation
☐ shelving
