APPLICANT: Marth Construction  
PROJECT LOCATION/WATERWAY: 5.5 Acre Property Northeast of the Center of the Intersection of 1678 and Well Road in Orchard Park, Cook County, Illinois (Section 20, TFMN, R12E).

FILE NUMBER: 202505986  
PROJECT REVIEW COMPLETED:  

Approved Jurisdictional Determination (JDO) (For Slices regulated under 33 CFR 328-130). An approved JD is an appealable act. (33 CFR 331.2)

Based on available information:
☐ There are no waters on the project site.
☐ There are non-jurisdictional waters on the project site.
☐ There are waters of the United States on the project site.
☐ There are both waters of the United States and non-jurisdictional waters on the project site.

Basis of Jurisdictional Determination:
☐ There are no jurisdictional waters of the United States present on the project site.
☐ The presence of waters which are currently used, or were used in the past, or may be susceptible for use to transport interstate or foreign commerce, including all waters which are subject to the ebb and flow of the tide (i.e., navigable waters of the U.S.) (33 CFR 328.1(a)(1))
☐ The presence of interstate waters (including intrastate wetlands). (33 CFR 328.3(a)(2))
☐ The presence of a tributary to an interstate or other water of the US. (33 CFR 328.3(a)(3))
☐ The presence of wetland’s adjacent (1) bordering, contiguous, or neighboring) to interstate or other waters of the US, except for those wetlands adjacent to other wetlands. (33 CFR 328.3(a)(7))
☐ The presence of an isolated water (e.g., intrastate lakes, rivers, streams (including intermittent streams), mudflats, sandflats, wetlands, sloughs, prairie pothole, wet meadows, playa lakes, or natural ponds).
☐ Other:
☐ Section 10 waterway.

Information Reviewed
☐ U. S. Fish and Wildlife Service National Wetland Inventory: MOKENA.
☐ U. S. Geological Survey Hydrosat Database: MOKENA, 204.
☐ USDA Natural Resource Conservation Service Soil Survey for Cook County.
☐ U. S. Geological Survey 7.5 Minute Historic Quadrangles: __________.
☐ U. S. Geological Survey 15 Minute Historic Quadrangles: __________.
☐ Aerials (Name & Date): AirPhoto 2002.
☐ Advanced Identification: Wetland Maps: __________.
☐ Site Visit Conducted on: 28 February 2003
☐ Other information:

Rationale for Basis (applies to both boxes checked above): Marley Creek drains into Hickory Creek, which drains into the Des Plaines River, a navigable water, and is under jurisdiction of this office. The detention pond on the property drains into Marley Creek and is also under jurisdiction of this office.

Lateral Extent of Jurisdiction (33 CFR 328 and 329):
☐ Ordinary High Water Mark indicated by:
☐ clear, natural line impressed on the bank
☐ denotation of terrestrial vegetation
☐ the presence of litter and debris
☐ sheiling
☐ changes in the character of soil
☐ wetland boundary

Basis for Declining Jurisdiction:
☐ Unable to confirm the presence of waters listed in 33 CFR 328.3(a)(1), 328.3(a)(2), or 328.3(a)(4) through 328.3(a)(7)
☐ Area under consideration is likely to have been jurisdictional under pre-SWANCC Migratory Bird Rule criteria
☐ Area under consideration is likely to have been jurisdictional under pre-SWANCC Migratory Bird Rule criteria
☐ Headquarters declined to approve jurisdiction on the basis of 328.3(a)(3) (attach copy of HQ rationale)

Confirmation of Wetland Boundaries
☐ This office is concerned with your wetland delineation report dated 30 November 2004, prepared by Christopher B. Burke Engineering, Ltd.
☐ This office does not concern your wetland boundary.

APPLICANT: Jeff Metz PROJECT LOCATION/WATERWAY: Northwest of the intersection of Rileton Road and Ronald Road in Cootes, Will County, Illinois.
FILE NUMBER: 20040132 PROJECT REVIEW COMPLETED: Office Field
Approved Jurisdictional Determination (JJD) (For sites regulated under 33 CFR 328-330). An approved JJD is an appraisable action. (33 CFR 531.2)

Based on available information:
☐ There are no waters on the project site.
☐ There are non-jurisdictional waters on the project site.
☐ There are waters of the United States on the project site.
☐ There are both waters of the United States and non-jurisdictional waters on the project site.

Basics of Jurisdictional Determination:
☐ There are no jurisdictional waters of the United States present on the project site.
☐ The presence of waters which are currently used, or were used in the past, or may be susceptible for use to transport interstate or foreign commerce, including all waters which are subject to the ebb and flow of the tides (i.e., navigable waters of the U.S.) (33 CFR 328.3(a)(1))
☐ The presence of interstate waters (including interstate wetlands) (33 CFR 328.3(a)(2))
☐ The presence of a tributary to an interstate, or other water of the US. (33 CFR 328.3(a)(5))
☐ The presence of wetlands adjacent to (bordering, contiguous, or neighboring) to interstate or other waters of the US, except for those wetlands adjacent to other wetlands. (33 CFR 328.3(a)(7))
☐ The presence of an isolated water (e.g., intermittent lakes, rivers, streams (including intermittent streams), mudflats, sandflats, wetlands, sloughs, prairie potholes, wet meadows, playa lakes, or natural ponds).
☐ Other:
☐ Section 10 waterway.

Information Reviewed:
☐ U. S. Fish and Wildlife Service National Wetland Inventory: DYER.
☐ U. S. Geological Survey Hydrologic Studies Field Survey for Will County.
☐ Arnie R. Schreck (Name & Date): Cootes, 1994.
☐ Site Visit Conducted on: January 12, 2005
☐ Other information: Plans entitled, "Lincolnshire East Volt 2 Storm Sewer & Grading Plans, Sheets 12-13 of 14" dated October 7, 1976 (received October 11, 1996), prepared by Joseph A. Schreck & Associates. Plans were submitted to this office on January 24, 2000 by the village engineer, Bill Stribick of Tech 3 Consulting Group, Inc.

Rationale for Basis (applies to any boxes checked above): Wetland A extends off the property and continues northwest draining underneath a concrete wall 3' tall and 8' wide and into a field tile at the back of lot 96. On Sheet 13 of 14 there is a note that states, "Locate existing 10" drain tile and connect to proposed storm sewer." The stormwater pipe sheet demonstrates a proposed roughly behind lot 96 and the utility line heads to the east and stops at lot 101. At lot 101 the storm sewer then continues north and daylighted at Charles Street between Donovan Drive and Edward Drive, as shown on Sheet 12 of 14. The tributary then continues heading northeast existing at the intersection of Ronald Road and Patricia Lane. The tributary will drain across Sieger Road into the Creek. Wetland B is adjacent to Wetland A and is therefore jurisdictional.

Lateral Extent of Jurisdiction (33 CFR 328 and 329):
☐ Ordinary High Water Mark indicated by:
☐ close, natural line impressed on the bank
☐ the presence of litter and debris
☐ the bank
☐ changes in the character of soil
☐ wetland boundary
☐ destruction of terrestrial vegetation
☐ shaving

☐ Aerials (Name & Date): ____________________________
☐ Advanced Identification Wetland Maps:
☐ Site Visit Conducted on: ____________________________
☐ Other information:

Rationale for Basis (applies to any boxes checked above): Forked Creek and its adjacent wetlands are tributary to the Kankakee River.

Lateral Extent of Jurisdiction (33 CFR 328 and 329):
☐ Culinary High Water Mark indicated by:
☐ clear, natural line impressed on the bank
☐ changes in the character of soil
☐ wetland boundary
☐ destruction of seminatural vegetation
☐ other:

Basis for Declining Jurisdiction:
☐ Unable to confirm the presence of waters listed in 33 CFR 328.3(a)(1), 328.3(a)(2), or 228.3(a)(4) through 328.3(a)(7)
☐ Area under consideration is likely to have been jurisdictional under pre-SWANCC Migratory Bird Rule criteria
☐ Area under consideration is not likely have been jurisdictional under pre-SWANCC Migratory Bird Rule criteria
☐ Headquarters declined to approve jurisdiction on the basis of 328.3(a)(3) (attach copy of HQ rationale)

Confirmation of Wetland Boundaries:
☐ This office agrees with your wetland delineation report dated Dec. 6, 2004, prepared by RTA & Associates.
☐ This office does not confirm your wetland boundary

Recommended by: ____________________________ Date: ____________________________

☑ Approved by: ____________________________ Date: ____________________________

1Wetlands are identified and delineated using the methods and criteria established in the Corps Wetland Delineation Manual (87 Manual) (i.e., occurrence of hydrophytic vegetation, hydro soils, and wetland hydrology). Processes for determining wetlands on agricultural lands may vary from methods described in the Corps Wetland Delineation Manual (87 Manual).

2Wetlands separated from other waters of the U.S. by non-tide dikes (rivers, natural river terraces, beach, dunes, and the like) are also adjacent.
APPROVED JURISDICTIONAL DETERMINATION DECISION DOCUMENT
U.S. Army Corps of Engineers, Chicago District

APPLICANT: Dan Toney
PROJECT LOCATION/WATERWAY: 10711 Alden Road, Milwaukee, Co. IL
FILE NUMBER: 200500164
PROJECT REVIEW COMPLETED: ☐ Office Field

Approved Jurisdictional Determination (JD): The JD for sites regulated under 33 CFR 328-330. An approved JD is an appealable action. (33 CFR 331.2) An approved JD is an appealable action. (33 CFR 331.2)

Based on available information:
☐ There are no waters on the project site.
☐ There are no jurisdictional waters on the project site.
☐ There are waters of the United States on the project site.
☐ There are both waters of the United States and non-jurisdictional waters on the project site.

Basis of Jurisdictional Determination:
☐ There are no jurisdictional waters of the United States present on the project site.
☐ The presence of waters which are currently used, or were used in the past, or may be susceptible for use to transport interstate or foreign commerce, including all waters which are subject to the ebb and flow of the tide (i.e., navigable waters of the U.S.) (33 CFR 328.3(a)(1))
☐ The presence of intermittent waters (including intermittent wetlands) (33 CFR 328.3(a)(2))
☐ The presence of an aquifer by an intermittent water or other water of the U.S. (33 CFR 328.3(a)(5))
☐ The presence of wetlands adjacent (bordering, contiguous, or neighboring) to intermittent or other waters of the U.S. except for those wetlands adjacent to other wetlands (33 CFR 328.3(a)(7))
☐ The presence of an isolated water (e.g., intermittent lakes, areas, streams (including intermittent streams), meadows, sandbars, wetlands, sloughs, prairie potholes, wet meadows, playa lakes, or natural ponds).
☐ Other: Section 10 waterway.

☐ Aerial Photographs (Name & Date): 2002.
☐ Aerial Identification Wetland Maps: MCHEMRY COUNTY.
☐ Site Visit Conducted on: December 10, 2004
☐ Other information:

Rationale for Basis (applies to any boxes checked above): The subject property contains an on-site pond that is tributary to the Nippersink Creek which is tributary to the Fox River, a navigable waterway under Department of the Army jurisdiction.

Lateral Extent of Jurisdiction (33 CFR 328 and 329):
☐ Ordinary High Water Mark indicated by:
☐ clear, natural line impressed on the bank
☐ changes in the character of soil
☐ wetland boundary
☐ destruction of terrestrial vegetation
☐ delineation described above.

Basis for Declining Jurisdiction:
☐ Unable to confirm the presence of waters listed in 33 CFR 328.3(a)(1), 328.3(a)(2), or 328.3(a)(4) through 328.3(a)(7)
☐ Area under consideration is likely to have been jurisdictional under pre-SWANCC Migratory Bird Rule criteria.
☐ Area under consideration is not highly likely to have been jurisdictional under pre-SWANCC Migratory Bird Rule criteria.
☐ Headquarters declined to approve jurisdiction on the basis of 328.3(a)(3) [attach copy of HQ rationale]

Confirmanation of Wetland Boundaries:

Approved Jurisdictional Determination (JUD) For sites regulated under 33 CFR 320-330. An approved JUD is an appealable action. (33 CFR 331.2). An approved JUD is an appealable action. (33 CFR 331.2)

Based on available information:

☐ There are no waters on the project site.
☐ There are non-jurisdictional waters on the project site.
☐ There are waters of the United States on the project site.
☐ There are both waters of the United States and non-jurisdictional waters on the project site.

Basic of Jurisdictional Determinations:

☐ There are no jurisdictional waters of the United States present on the project site.
☐ The presence of waters which are currently used, or were used in the past, or may be susceptible for use to transport interstate or foreign commerce, including all waters which are subject to the ebb and flow of the tide (i.e., navigable waters of the U.S.). (33 CFR 328.3(a)(1))
☐ The presence of interstate water (including interstate wetlands). (33 CFR 328.3(a)(2))
☐ The presence of a tributary to an interstate water or other water of the U.S. (33 CFR 328.3(a)(5))
☐ The presence of wetlands adjacent (bordering, contiguous, or neighboring) to interstate or other waters of the U.S. except for those wetlands adjacent to other wetlands. (33 CFR 328.3(a)(7))
☐ The presence of an isolated water (e.g., intrasite lakes, rivers, streams (including inorganic streams), mudflats, sandflats, wetlands, sloughs, prairie potholes, wet meadows, playa lakes, or natural ponds).
☐ Other: Section 10 wetway.

Note 1: Wetlands are identified and delineated using the methods and criteria established in the Corps Wetland Delineation Manual (F Manual) 16.5, occurrence of hydric vegetation (hydric soils and wetland hydrology). Procedures for determining wetlands on agricultural lands may vary from methods described in the Corps Wetland Delineation Manual (387).

Note 2: Wetlands separated from other waters of the U.S. by man-made dikes or berms, natural river bottoms, beach dunes, and the like are also adjacent.
APPLICANT: Stevenson Development
PROJECT LOCATION/WATERWAY: Parcel located north of Berner Road and east of Letchworth Road in unincorporated Kane County, Illinois (NE 1/4 of Section 35, T42N R6E)
FILE NUMBER: 200500299
PROJECT REVIEW: COMPLETED: Office Field

Approved Jurisdictional Determination (JID) (For sites evaluated under 33 CFR 328.330). An approved JID is an appealable action. (33 CFR 331.2)

Based on available information:

☐ There are no waters on the project site.
☐ There are non-jurisdictional waters on the project site.
☐ There are waters of the United States on the project site.
☐ There are both waters of the United States and non-jurisdictional waters on the project site.

Basis of Jurisdictional Determination:

☐ There are no jurisdictional waters of the United States present on the project site.
☐ The presence of waters which are currently used, or were used in the past, may be susceptible for use to transport interstate or foreign commerce, including all waters which are subject to the ebb and flow of the tide (i.e., navigable waters of the U.S.) (33 CFR 328.3(a)(1)).
☐ The presence of interstate waters (including interstate wetlands). (33 CFR 328.3(c)(2))
☐ The presence of a tributary to an interstate water or other water of the US (33 CFR 328.3(c)(3))
☐ The presence of wetlands adjacent (bordering, contiguous, or neighboring) to interstate or other waters of the US, except for those wetlands adjacent to other wetlands (33 CFR 328.3(c)(7) )
☐ The presence of an isolated water (e.g., intermittent lakes, rivers, streams (including intermittent streams), mudflats, sandflats, wetlands, swamps, prairie potholes, wet meadows, playas, lakes, or natural ponds).
☐ Other:
☐ Section 10 waterbody

Section 10 Information

Information Reviewed:
☐ U.S. Fish and Wildlife Service National Wetland Inventory: PIN lEG RO VE GRO.
☐ UNDA Natural Resources Conservation Service Soil Survey for Kane County.
☐ U.S. Geological Survey 7 5 Minute Historic Quadrangles:
☐ U.S. Geological Survey 15 Minute Historic Quadrangles:
☐ Aerial Photographs (Name & Date): AirPhoto USA Nov. 2002
☐ Other information: Wetland Assessment Report, dated October 13, 2004, prepared by CB&BW.

Rationale for Basis (applies to any boxes checked above): There are two intermittent tributaries (unnamed) on the subject property. The flow from these tributaries is currently conveyed through a drain tile. Any manipulation of the drain tile would require a permit from the U.S. Army Corps of Engineers. Also, both Wetlands 1 and 2 connect to these tributaries. Wetland 1 is directly online with the southern tributary and Wetland 2 is connected by a drain tile to the northern tributary. All of the waters on-site are tributary to Hurlbut Creek which flows to Coon Creek, a tributary of the Kickapoo River.

Lateral Extent of Jurisdiction (33 CFR 328 and 329):
☐ Ordinary High Water Mark indicated by:
☐ clear, natural line impressed on the bank
☐ the presence of litter and debris
☐ changes in the character of soils
☐ wetland boundary
☒ destruction of terrestrial vegetation
☒ shelving
☒ other: drain tile that carries tributary flow

Basis for Declining Jurisdiction:

☐ Unable to confirm the presence of waters listed in 33 CFR 328.3(a)(1), 328.3(a)(2), or 328.3(a)(4) through 328.3(a)(7)
☐ Area under consideration is likely to have been jurisdictional under pre-SWANCC Migratory Bird Rule criteria
☐ Area under consideration is not likely have been jurisdictional under pre-SWANCC Migratory Bird Rule criteria
☐ Headquarters declined to approve jurisdiction on the basis of 328.3(a)(3) [attach copy of HQ rationale]
