### **INTERIM APPROVED JURISDICTIONAL DETERMINATION FORM U.S. Army Corps of Engineers**

This form should be completed by following the instructions provided in the Interim Approved Jurisdictional Determination Form User Manual.

#### **SECTION I: BACKGROUND INFORMATION**

**A. COMPLETION DATE FOR APPROVED JURISDICTIONAL DETERMINATION (AJD): 2/8/2019**

**B. ORM NUMBER IN APPROPRIATE FORMAT (e.g., HQ-2015-00001-SMJ): LRC-2018-101 I-55 at IL 59 Access Project**

**C. PROJECT LOCATION AND BACKGROUND INFORMATION: This JD is limited to certain features identified within the right of way where impacts are proposed for the I-55 at IL 59 Interchange Project P-91-015-19.**

State: IL County/parish/borough: Will County City: Shorewood

Center coordinates of site (lat/long in degree decimal format): Lat. 41.503119, Long. -88.19817.

Map(s)/diagram(s) of review area (including map identifying single point of entry (SPOE) watershed and/or potential jurisdictional areas where applicable) is/are:  attached  in report/map titled

Other sites (e.g., offsite mitigation sites, disposal sites, etc.) are associated with this action and are recorded on a different jurisdictional determination (JD) form. List JD form ID numbers (e.g., HQ-2015-00001-SMJ-1):

**D. REVIEW PERFORMED FOR SITE EVALUATION:**

Office (Desk) Determination Only. Date:

Office (Desk) and Field Determination. Office/Desk Dates: 11/15/2018 Field Date(s): 11/8/2018.

#### **SECTION II: DATA SOURCES**

Check all that were used to aid in the determination and attach data/maps to this AJD form and/or references/citations in the administrative record, as appropriate.

Maps, plans, plots or plat submitted by or on behalf of the applicant/consultant. Title/Date: I-55 at IL 59 Interchange Project P-91-015-19 ESU SQ 21886 Reference Documents from: INHS Wetland Determination Report, Addendum A Dated July 2018 For Coordination Meeting with Army Corps of Engineers October 12, 2018.

Data sheets prepared/submitted by or on behalf of the applicant/consultant.

Data sheets/delineation report are sufficient for purposes of AJD form. Title/Date: I-55 at IL 59 Interchange Project P-91-015-19 ESU SQ 21886 Reference Documents from: INHS Wetland Determination Report, Addendum A Dated July 2018 For Coordination Meeting with Army Corps of Engineers October 12, 2018..

Data sheets/delineation report are not sufficient for purposes of AJD form. Summarize rationale and include information on revised data sheets/delineation report that this AJD form has relied upon:

Revised Title/Date:

Data sheets prepared by the Corps. Title/Date:

Corps navigable waters study. Title/Date:

CorpsMap ORM map layers. Title/Date:

USGS Hydrologic Atlas. Title/Date:

USGS, NHD, or WBD data/maps. Title/Date:

USGS 8, 10 and/or 12 digit HUC maps. HUC number:

USGS maps. Scale & quad name and date: 1:24,000, Plainfield, IL.

USDA NRCS Soil Survey. Citation: Soil Survey Staff, Natural Resources Conservation Service, United States Department of Agriculture. Web Soil Survey. Available online at the following link:

<https://websoilsurvey.sc.egov.usda.gov/>. Accessed 11/15/2018.

USFWS National Wetlands Inventory maps. Citation:

State/Local wetland inventory maps. Citation:

- FEMA/FIRM maps. Citation:
- Photographs:  Aerial. Citation: Multiple aerial views obtained on Google Earth Pro. or  Other. Citation:
- LiDAR data/maps. Citation:
- Previous JDs. File no. and date of JD letter:
- Applicable/supporting case law:
- Applicable/supporting scientific literature:
- Other information (please specify):

**SECTION III: SUMMARY OF FINDINGS**

Complete ORM “Aquatic Resource Upload Sheet” or Export and Print the Aquatic Resource Water Droplet Screen from ORM for All Waters and Features, Regardless of Jurisdictional Status – Required

**A. RIVERS AND HARBORS ACT (RHA) SECTION 10 DETERMINATION OF JURISDICTION:**

“navigable waters of the U.S.” within RHA jurisdiction (as defined by 33 CFR part 329) in the review area.

• **Complete Table 1 - Required**

NOTE: If the navigable water is not subject to the ebb and flow of the tide or included on the District’s list of Section 10 navigable waters list, DO NOT USE THIS FORM TO MAKE THE DETERMINATION. The District must continue to follow the procedure outlined in 33 CFR part 329.14 to make a Section 10 RHA navigability determination.

**B. CLEAN WATER ACT (CWA) SECTION 404 DETERMINATION OF JURISDICTION:** “waters of the U.S.” within CWA jurisdiction (as defined by 33 CFR part 328.3) in the review area. **Check all that apply.**

(a)(1): All waters which are currently used, were used in the past, or may be susceptible to use in interstate or foreign commerce, including all waters which are subject to the ebb and flow of the tide. (Traditional Navigable Waters (TNWs))

• **Complete Table 1 - Required**

This AJD includes a case-specific (a)(1) TNW (Section 404 navigable-in-fact) determination on a water that has not previously been designated as such. Documentation required for this case-specific (a)(1) TNW determination is attached.

(a)(2): All interstate waters, including interstate wetlands.

• **Complete Table 2 - Required**

(a)(3): The territorial seas.

• **Complete Table 3 - Required**

(a)(4): All impoundments of waters otherwise identified as waters of the U.S. under 33 CFR part 328.3.

• **Complete Table 4 - Required**

(a)(5): All tributaries, as defined in 33 CFR part 328.3, of waters identified in paragraphs (a)(1)-(a)(3) of 33 CFR part 328.3.

• **Complete Table 5 - Required**

(a)(6): All waters adjacent to a water identified in paragraphs (a)(1)-(a)(5) of 33 CFR part 328.3, including wetlands, ponds, lakes, oxbows, impoundments, and similar waters.

• **Complete Table 6 - Required**

Bordering/Contiguous.

Neighboring:

(c)(2)(i): All waters located within 100 feet of the ordinary high water mark (OHWM) of a water identified in paragraphs (a)(1)-(a)(5) of 33 CFR part 328.3.

(c)(2)(ii): All waters located within the 100-year floodplain of a water identified in paragraphs (a)(1)-(a)(5) of 33 CFR part 328.3 and not more than 1,500 feet of the OHWM of such water.

(c)(2)(iii): All waters located within 1,500 feet of the high tide line of a water identified in paragraphs (a)(1) or (a)(3) of 33 CFR part 328.3, and all waters within 1,500 feet of the OHWM of the Great Lakes.

(a)(7): All waters identified in 33 CFR 328.3(a)(7)(i)-(v) where they are determined, on a case-specific basis, to have a significant nexus to a water identified in paragraphs (a)(1)-(a)(3) of 33 CFR part 328.3.

• **Complete Table 7 for the significant nexus determination. Attach a map delineating the SPOE watershed boundary with (a)(7) waters identified in the similarly situated analysis. - Required**

Includes water(s) that are geographically and physically adjacent per (a)(6), but are being used for established, normal farming, silviculture, and ranching activities (33 USC Section 1344(f)(1)) and therefore are not adjacent and require a case-specific significant nexus determination.

(a)(8): All waters located within the 100-year floodplain of a water identified in paragraphs (a)(1)-(a)(3) of 33 CFR part 328.3 not covered by (c)(2)(ii) above and all waters located within 4,000 feet of the high tide line or OHWM of a water identified in paragraphs (a)(1)-(a)(5) of 33 CFR part 328.3 where they are determined on a

case-specific basis to have a significant nexus to a water identified in paragraphs (a)(1)-(a)(3) of 33 CFR part 328.3.

- **Complete Table 8 for the significant nexus determination. Attach a map delineating the SPOE watershed boundary with (a)(8) waters identified in the similarly situated analysis. - Required**

Includes water(s) that are geographically and physically adjacent per (a)(6), but are being used for established, normal farming, silviculture, and ranching activities (33 USC Section 1344(f)(1)) and therefore are not adjacent and require a case-specific significant nexus determination.

### C. NON-WATERS OF THE U.S. FINDINGS:

#### **Check all that apply.**

The review area is comprised entirely of dry land.

Potential-(a)(7) Waters: Waters that DO NOT have a significant nexus to a water identified in paragraphs (a)(1)-(a)(3) of 33 CFR part 328.3.

- **Complete Table 9 and attach a map delineating the SPOE watershed boundary with potential (a)(7) waters identified in the similarly situated analysis. - Required**

Includes water(s) that are geographically and physically adjacent per (a)(6), but are being used for established, normal farming, silviculture, and ranching activities (33 USC Section 1344(f)(1)) and therefore are not adjacent and require a case-specific significant nexus determination.

Potential-(a)(8) Waters: Waters that DO NOT have a significant nexus to a water identified in paragraphs (a)(1)-(a)(3) of 33 CFR part 328.3.

- **Complete Table 9 and attach a map delineating the SPOE watershed boundary with potential (a)(8) waters identified in the similarly situated analysis. - Required**

Includes water(s) that are geographically and physically adjacent per (a)(6), but are being used for established, normal farming, silviculture, and ranching activities (33 USC Section 1344(f)(1)) and therefore are not adjacent and require a case-specific significant nexus determination.

Excluded Waters (Non-Waters of U.S.), even where they otherwise meet the terms of paragraphs (a)(4)-(a)(8):

- **Complete Table 10 - Required**

(b)(1): Waste treatment systems, including treatment ponds or lagoons designed to meet the requirements of the CWA.

(b)(2): Prior converted cropland.

(b)(3)(i): Ditches with ephemeral flow that are not a relocated tributary or excavated in a tributary.

(b)(3)(ii): Ditches with intermittent flow that are not a relocated tributary, excavated in a tributary, or drain wetlands.

(b)(3)(iii): Ditches that do not flow, either directly or through another water, into a water identified in paragraphs (a)(1)-(a)(3).

(b)(4)(i): Artificially irrigated areas that would revert to dry land should application of water to that area cease.

(b)(4)(ii): Artificial, constructed lakes and ponds created in dry land such as farm and stock watering ponds, irrigation ponds, settling basins, fields flooded for rice growing, log cleaning ponds, or cooling ponds.

(b)(4)(iii): Artificial reflecting pools or swimming pools created in dry land.<sup>1</sup>

(b)(4)(iv): Small ornamental waters created in dry land.<sup>1</sup>

(b)(4)(v): Water-filled depressions created in dry land incidental to mining or construction activity, including pits excavated for obtaining fill, sand, or gravel that fill with water.

(b)(4)(vi): Erosional features, including gullies, rills, and other ephemeral features that do not meet the definition of tributary, non-wetland swales, and lawfully constructed grassed waterways.<sup>1</sup>

(b)(4)(vii): Puddles.<sup>1</sup>

(b)(5): Groundwater, including groundwater drained through subsurface drainage systems.<sup>1</sup>

(b)(6): Stormwater control features constructed to convey, treat, or store stormwater that are created in dry land.<sup>1</sup>

(b)(7): Wastewater recycling structures created in dry land; detention and retention basins built for wastewater recycling; groundwater recharge basins; percolation ponds built for wastewater recycling; and water distributary structures built for wastewater recycling.

Other non-jurisdictional waters/features within review area that do not meet the definitions in 33 CFR 328.3 of (a)(1)-(a)(8) waters and are not excluded waters identified in (b)(1)-(b)(7).

- **Complete Table 11 - Required.**

### D. ADDITIONAL COMMENTS TO SUPPORT AJD:

<sup>1</sup> In many cases these excluded features will not be specifically identified on the AJD form, unless specifically requested. Corps Districts may, in case-by-case instances, choose to identify some or all of these features within the review area.

**Jurisdictional Waters of the U.S.**

**Table 1. (a)(5)Tributaries**

<b>(a)(5) Waters Name</b>	<b>Flow Regime</b>	<b>(a)(1)-(a)(3) Water Name to which this (a)(5) Tributary Flows</b>	<b>Tributary Breaks</b>	<b>Rationale for (a)(5) Designation and Additional Discussion. Identify flowpath to (a)(1)-(a)(3) water or attach map identifying the flowpath; explain any breaks or flow through excluded/non-jurisdictional features, etc.</b>
OSW 17/Site 73	Perennial	Des Plaines River	No	OSW 17 begins just north of Seil Road, flows into the DuPage River, which in turn flows into the Des Plaines River.
OSW 22	Intermittent	Des Plaines River	Yes	OSW 22 flows into the DuPage River, which in turn flows into the Des Plaines River. No real tributary break but the channel that runs east of Route 59 loses its bed and bank characteristics because it was filled with rip rap. However, the channel immediately upstream and downstream has defined bed/bank/OHWM.

**Non-Jurisdictional Waters**

**Table 2. Non-Waters/Excluded Waters and Features**

<b>Paragraph (b) Excluded Feature/Water Name</b>	<b>Rationale for Paragraph (b) Excluded Feature/Water and Additional Discussion.</b>
OSW 23 (EXCLDB3II)	This is a ditch excavated in the upland. Historic aerial photos and soils map do not show a stream at that location. Flow is intermittent with no clear connection to a downstream water, no bed and banks, and OHWM.
Site 4 (EXCLDB3I)	This is a road side ditch excavated right next to W Frontage Road. Historic aerial photos and soils map do not show a stream at that location. Flow is ephemeral.
Site 15 (EXCLDB3I)	This is a road side ditch excavated right next to Route 59. Historic aerial photos and soils map do not show a stream at that location. Flow is ephemeral.
Site 20 (EXCLDB3II)	This is a road side ditch excavated right next to Route 59. Historic aerial photos and soils map do not show a stream at that location. Flow is intermittent. No defined bed and banks/OHWM.
Site 21 (EXCLDB3I)	This is a road side ditch excavated right next to Route 59. Historic aerial photos and soils map do not show a stream at that location. Flow is ephemeral.
Site 22 (EXCLDB3I)	This is a road side ditch excavated right next to I-55. Historic aerial photos and soils map do not show a stream at that location. Flow is ephemeral.
Site 23 (EXCLDB3I)	This is a road side ditch excavated right next to W Frontage Road. Historic aerial photos and soils map do not show a stream at that location. Flow is ephemeral.
Site 26 (EXCLDB3I)	This is a road side ditch excavated right next to I-55. Historic aerial photos and soils map do not show a stream at that location. Flow is ephemeral.
Site 29 (EXCLDB3I)	This is a road side ditch excavated right next to W Frontage Road. Historic aerial photos and soils map do not show a stream at that location. Flow is ephemeral.
Site 79 (EXCLDB3II)	This is a road side ditch excavated right next to I-55. Historic aerial photos and soils map do not show a stream at that location. Flow is intermittent. No defined bed and banks/OHWM.
Site 81 (EXCLDB3I)	This is a road side ditch excavated right next to I-55. Historic aerial photos and soils map do not show a stream at that location. Flow is ephemeral.
Site 82 (EXCLDB3I)	This is a road side ditch excavated right next to I-55. Historic aerial photos and soils map do not show a stream at that location. Flow is ephemeral.
Site 89 (EXCLDB4II)	This is a pond that was constructed in 2008 on dry land as is apparent from the 5/2008 aerial photography obtained on Google Earth Pro.
