**SECTION II: SUMMARY OF FINDINGS**

**A. RHA SECTION 10 DETERMINATION OF JURISDICTION.**

There **Are no** "navigable waters of the U.S." within Rivers and Harbors Act (RHA) jurisdiction (as defined by 33 CFR part 329) in the review area. [Required]

**B. CWA SECTION 404 DETERMINATION OF JURISDICTION.**

There **Are no** "waters of the U.S." within Clean Water Act (CWA) jurisdiction (as defined by 33 CFR part 328) in the review area. [Required]

**2. Non-regulated waters/wetlands (check if applicable):<sup>1</sup>**

- Potentially jurisdictional waters and/or wetlands were assessed within the review area and determined to be not jurisdictional. Explain: **A tributary is located on the western edge of the parcel flowing south. It enters the farm field through a culvert under Harmony Road. At Harmony Road, this intermittent tributary was dry during site visit likely due to seasonal dry conditions, but likely flows only seasonally or maybe only during rain events. Between Harmony Road and Getty Road, the tributary is not continuous and not evident on aerials in all years. There is no continuous connection between Harmony Road and Getty Road. The wetland is no located within the 100 year floodplain. Based on the lack of continuous connection to the south, the subject wetland is isolated .**

**A. REPORT COMPLETION DATE FOR APPROVED JURISDICTIONAL DETERMINATION (JD): 28-Mar-2017**

**B. DISTRICT OFFICE, FILE NAME, AND NUMBER:** Chicago District, Des Plaines River bridge alignment, LRC-2016-809

**C. PROJECT LOCATION AND BACKGROUND INFORMATION:** This JD is for 2 isolated wetlands located on the south side of the Des Plaines River near the intersection of Scheitzer Road and Vetter Road. The 2 wetlands - Wetland 1 and Wetland 2 were found to be isolated from any waterway because of their placement in a large open field, Wetland 2 drains south, via overland flow, to Wetland 1. Wetland 1 leaves site via roadside ditch and stormsewer, but the outfall for the drainage that enters the roadside ditch could not be found and it is unclear where it might finally empty into a Waters of the US. Cedar Creek does lie to the south of the project area, but no stormsewer outfalls could be located that might carry drainage from the applicant's site.

**B. ADDITIONAL COMMENTS TO SUPPORT JD: \*\*may want to include info about soils, and distance to the nearest JD area\*\*.**

- Area(s) are geographically isolated. The location of Wetland 1 and 2 is in a low point in the overall project area. Some runoff from wetland 1 enters of stormsewer system.
- Area(s) do not have a hydrologic nexus. There is no evidence of overland flow from Wetland 1 and 2 to the north to Wetland 3, or the Des Plaines River because of a rise in topography in the landscape between the wetlands and the river. Additionally, the runoff from Wetland 1 enters a stormsewer system, the outfall of which could not be traced to a Waters of the US .
- Area(s) do not have an ecological nexus. These wetlands are located in an open field which is currently used as recreation, it has been graded and is very disturbed, cutting off any natural ecological nexus that might have existed in the past.
- Area(s) do not have evidence of a subsurface flow connection to a jurisdictional water. .
- Area(s) do not have evidence of surface overland sheet flow. .
- Area(s) are not located within the flood plain. .

Office (Desk) Determination. Date: February 15, 2017

Field Determination. Date(s): February 14, 2017

**SECTION II: SUMMARY OF FINDINGS**

**A. RHA SECTION 10 DETERMINATION OF JURISDICTION.**

There **Are no** "navigable waters of the U.S." within Rivers and Harbors Act (RHA) jurisdiction (as defined by 33 CFR part 329) in the review area. [Required]

**B. CWA SECTION 404 DETERMINATION OF JURISDICTION.**

There **Are no** "waters of the U.S." within Clean Water Act (CWA) jurisdiction (as defined by 33 CFR part 328) in the review area. [Required]

**2. Non-regulated waters/wetlands (check if applicable):<sup>1</sup>**

- Potentially jurisdictional waters and/or wetlands were assessed within the review area and determined to be not jurisdictional.  
Explain: **Wetlands 1 and 2 are both shallow isolated depressional features with no outlet or surface water connection to any flowing Water of the U.S..**

**SECTION III: CWA ANALYSIS**

**E. ISOLATED [INTERSTATE OR INTRA-STATE] WATERS, INCLUDING ISOLATED WETLANDS, THE USE, DEGRADATION OR DESTRUCTION OF WHICH COULD AFFECT INTERSTATE COMMERCE, INCLUDING ANY SUCH WATERS (CHECK ALL THAT APPLY):<sup>2</sup>**

which are or could be used by interstate or foreign travelers for recreational or other purposes.

from which fish or shellfish are or could be taken and sold in interstate or foreign commerce.

Tributary waters: linear feet width (ft).

Other non-wetland waters: acres.

Identify type(s) of waters: .

Wetlands: acres.

<sup>1</sup> Supporting documentation is presented in Section III.F.

<sup>2</sup> Prior to asserting or declining CWA jurisdiction based solely on this category, Corps Districts will elevate the action to Corps and EPA HQ for review consistent with the process described in the Corps/EPA Memorandum Regarding CWA Act Jurisdiction Following Rapanos.

**F. NON-JURISDICTIONAL WATERS, INCLUDING WETLANDS (CHECK ALL THAT APPLY):**

- If potential wetlands were assessed within the review area, these areas did not meet the criteria in the 1987 Corps of Engineers Wetland Delineation Manual and/or appropriate Regional Supplements.
- Review area included isolated waters with no substantial nexus to interstate (or foreign) commerce.
  - Prior to the Jan 2001 Supreme Court decision in "SWANCC," the review area would have been regulated based solely on the "Migratory Bird Rule" (MBR).
- Waters do not meet the "Significant Nexus" standard, where such a finding is required for jurisdiction. Explain: .
- Other: (explain, if not covered above): .

Provide acreage estimates for non-jurisdictional waters in the review area, where the sole potential basis of jurisdiction is the MBR factors (i.e., presence of migratory birds, presence of endangered species, use of water for irrigated agriculture), using best professional judgment (check all that apply):

- Non-wetland waters (i.e., rivers, streams): linear feet width (ft).
- Lakes/ponds: acres.
- Other non-wetland waters: acres. List type of aquatic resource: .
- Wetlands: 0.1 acres.
